British Deputy High Commissioner Karachi Visits LUMS to Explore Education Partnership Opportunities

Sarah Mooney, Deputy High Commissioner Karachi and Trade Director for Pakistan, on a visit to LUMS on January 26, expressed the desire to identify synergies to further explore education partnership opportunities with LUMS.

She was joined by other representatives from the British High Commission including Clara Strandhoj, Head of Lahore Office and Rehan Shahid, Senior Trade Policy Advisor. At the meeting, LUMS was represented by Dr. Arshad Ahmad, Vice Chancellor; Dr. Tariq Jadoon, Provost; Mohammed Ali Khan, Executive Director of Strategic Initiatives, and Nuzhat Kamran, Director of Advancement.

Ms. Mooney spoke about the need to collaborate with universities like LUMS that bring together diverse people and perspectives. "Wherever people from different disciplines come together and encourage free-flowing conversation, that's where you find the right ideas."

She elaborated on the need to establish linkages with universities and institutes in the UK, which the British High Commission can facilitate in establishing. Such innovative collaborations are essential to explore innovative answers, she said. "Industry wants solutions for problems that they are looking at right now. They are not looking to the horizon 15 years from now which is going to require different data sets and a different understanding of behavioral science." Universities like LUMS can provide guidance in this regard, she added. [Read More](#)

Spanish Ambassador Visits LUMS

His Excellency Mr. Jose Antonio de Ory, the Spanish Ambassador to Pakistan, visited LUMS on January 20 to discuss opportunities of possible collaboration. He was accompanied by Ms. Inés Mena Gómez de Merodio, Head of Consular Affairs, Embassy of Spain; Mian Jalal Salahuddin, the Honorary Consul of Spain for Punjab and Ms. Farah Farouk, Head of Business Development, Jalal Salahuddin Bespoke Events & Creative Services.

They were welcomed by LUMS' leadership, including Mr. Abdul Razak Dawood, Pro Chancellor; Dr. Arshad Ahmad, Vice Chancellor; Mr. Muhammad Ali Khan, Executive Director, Strategic Initiatives; Dr. Furrukh Khan, Director, Office of International Affairs, and Ms. Nuzhat Kamran, Director, Office of Advancement. Also present were faculty members and staff who have previous or existing connections with Spain.

Ms. Kamran shared an overview of LUMS, its 'Learning Without Borders' perspective and the inclusive, interdisciplinary practices in place. Mr. Khan talked about the importance of internationalisation and forming lasting connections with the University's foreign counterparts. He also noted that Spain is renowned for its high-quality business schools and could be a potential avenue for collaboration. [Read More](#)

President of Pakistan and LUMS Leadership Discuss the Future of Higher Education in Pakistan

The President of Pakistan and Chancellor, LUMS, Dr. Arif Alvi, visited the University on January 27, 2023 to meet the LUMS leadership.

He was welcomed by Mr. Abdul Razak Dawood, Pro Chancellor, LUMS; Mr. Shahid Hussain, Rector; Members of the Management Committee; Dr. Arshad Ahmad, Vice Chancellor, LUMS; Dr. Tariq Jadoon, Provost, LUMS and Dr. Muhammad Sabieh Anwar, Ahmed Dawood Chair, Dean, Syed Babar Ali School of Science and Engineering.

Ms. Nuzhat Kamran, Director, Office of Advancement apprised the President of the University's strategic priorities, latest accolades, and the impactful research being conducted. Dr. Alvi appreciated the work being done at LUMS and assured the leadership of his support for the University's effort to promote quality education in the country.

Dr. Alvi also met Founding Pro Chancellor, Syed Babar Ali, and members of the University Advisory Board. They exchanged ideas on the current state of higher education in Pakistan and what learning must entail

at this level. They also discussed the role of LUMS in the country's progress over the next decade. [Read More](#)

LUMS Students and Recruiters Network at Annual Career Fair 2023

Lahore, February 4th, 2023: Ranked as the top university in Pakistan by QS Graduate Employability Ranking 2022, LUMS has a strong network of 1,600 recruiting partners that help students find placements. The Career Services Office (CSO) at the University has several programmes in place for supporting students towards their career readiness, exploration, and getting the right job. One such initiative is the annual Career Fair by CSO that aims to provide opportunities to students for gainful employment while strengthening their partnership with existing and prospective employers.

LUMS hosted its milestone annual Career Fair this Saturday with participation from notable organisations across multiple industries. The Career Fair welcomed around 200 national and international reputed organisations. The engagement between students and recruiters included activities such as extensive on-spot screening interviews, seeking information about each other and submission of resumes. Moreover, organisation representatives also counselled students regarding their career choices and job market requirements. [Read More](#)

The Transformational 'Ambassadors for Change' Programme at LUMS

'Quality Education for All' is one of the SDGs closest to the LUMS Centre for Business and Society's heart and vision. The Centre actively works towards creating opportunities that not only offer educational empowerment to society but also give a platform to the LUMS students to give back to the community through their dedication to the cause.

With the aim to create and inspire sustainable change, the Centre for Business and Society (CBS), LUMS, in partnership with The Citizens Foundation (TCF), recently conducted the 4th cycle of its flagship 'CBS Ambassadors for Change Programme'. The orientation for the educational programme was held on January 15, 2023, at the Suleman Dawood School of Business (SDSB). The transformational three-month-long, programme is being attended by 76 TCF students, supported by a cohort of 27 volunteers, selected by CBS from the LUMS student body, who are participating as teachers and coordinators. More Than 90 Trees Replanted Throughout the LUMS Campus

The LUMS campus is home to a diverse ecosystem with more than 900 trees belonging to hundreds of species, many of which are native to this geographical region.

Recently, several trees had to be removed from the Library Garden, the site for the new Central Building. To save and maintain the rich green environment of LUMS, the General Administration and Services department, along with the horticulture team, carefully removed all the trees and replanted them in different places in the campus, thus giving them a new life.

This new space, named the Yusuf H. Shirazi Complex, will house six centres at LUMS, and will be the central point of collaboration where students and researchers can get together and exchange ideas. The building will be utilised to hold classes, seminars, workshops, conferences, and various events. [Read More](#)

LUMS History Faculty Wins Prestigious Turriano ICOHTEC Prize

Faculty at the Mushtaq Ahmad Gurmani School of Humanities and Social Sciences (MGSHSS) are making an impact around the world through their research, teaching, and publications. In recent news, Associate Professor of History, Dr. Waqar Zaidi was awarded the Turriano ICOHTEC Prize for Young Historians, for his book, *Technological Internationalism and World Order: Aviation, Atomic Energy, and the Search for International Peace 1920-1950*.

This award, organised by the 2022 International Committee for the History of Technology (ICOHTEC) and sponsored by Fundación Juanelo Turriano, recognises the best first/early career book in the history of technology. Dr. Zaidi was selected for demonstrating rigour, intellectual bravery, and readability in combining the history of technology with the history of international relations. The prize-winning book will be presented and discussed at a special session of the organisation's international symposium. [Read More](#)

LUMS Faculty Win European Union Grant for Green Energy Solutions

Two Electrical Engineering faculty, Dr. Hassan Abbas Khan and Professor Nauman Ahmad Zaffar at the Syed Babar Ali School of Science and Engineering, LUMS, have won the European Horizon grant, funded by the European Union, to develop technology for rural energy provisioning.

This prestigious funding is aimed for a ground-breaking project titled, Low-cost, circular, plug-and-play, off-grid energy for remote locations including Hydrogen (LoCEL-H2) a response to a call for sustainable, secure and competitive energy supply. The project has been awarded to a consortium of ten international entities (universities and industry partners) with a total consortium funding of about 8.7 million euros for 4 years. LUMS is taking the lead in the development of a key technology and the University's share is 1.384 million euros, including 25 per cent overhead. [Read More](#)

LUMS University Advisory Board Comes Together To Discuss Future Directions

The LUMS University Advisory Board plays a key role in helping to shape the overall direction of the university, and in ensuring that it remains focused on its mission and goals. Comprised of renowned academics and experts from some of the best universities of the world, the group brings a wealth of experience to the table and plays a crucial role in providing guidance and support to LUMS as it strives to achieve its mission.

The 5th [University Advisory Board](#) (UAB) meeting was held in the last week of January 2023. Members came together to reflect on the learnings from the past year, share their global experiences with the LUMS leadership and also discuss current trends and opportunities in higher education to help lay the foundation of future initiatives at the University. Joining the UAB were members of the LUMS Management Committee including Syed Babar Ali, Founding Pro Chancellor; Mr. Abdul Razak Dawood, Pro Chancellor; Mr. Shahid Hussain, Rector and Dr. Arshad Ahmad, Vice Chancellor, LUMS. “Foreign Affairs... will tolerate wide differences of opinion. Its articles will not represent any consensus of beliefs. What is demanded of them is that they shall be competent and well informed, representing honest opinions seriously held and convincingly expressed.... It does not accept responsibility for the views expressed in any article, signed or unsigned, which appear in its pages. What it does accept is the responsibility for giving them a chance to appear there.”

Archibald Cary Coolidge, Founding Editor
Volume 1, Number 1 • September 1922

SPECIAL REPORT: TEAMWORK REINVENTED

*How to Orchestrate Successful Teams
in the New World of Work*

24 Turn Your Teams Inside Out

Externally focused teams can drive innovation, performance, and distributed leadership — but adopting them requires a shift in mindset.

By Deborah Ancona and Henrik Bresman

30 What Employees Want Most in Uncertain Times

When threats loom, managers must go beyond the tried-and-true techniques for supporting employees to address divergent concerns and build trust.

*By Kristine W. Powers and
Jessica B.B. Diaz*

35 Managing the New Tensions of Hybrid Work

Leaders are meeting employee demands for more flexible work arrangements amid concerns over the impact on organizational culture and innovation capability.

*By Jonathan Trevor and
Matthias Holweg*

FEATURES

40 Make Leader Character Your Competitive Edge

Character is about a lot more than ethics — and fostering a culture where it is valued equally alongside competence can result in better decisions and better outcomes. *By Mary Crossan, William (Bill) Furlong, and Robert D. Austin*

48 How to Build Good AI Solutions When Data Is Scarce

Data-efficient AI techniques are emerging — and that means you don't always need large volumes of labeled data to train AI systems based on neural networks. *By Rama Ramakrishnan*

54 Improve Your Diversity Measurement for Better Outcomes

Managers need better data collection practices if they are to gain a clearer picture of DEI and design more effective interventions. *By Derek R. Avery, Enrica N. Ruggs, Larissa R. Garcia, Horatio D. Traylor, and Noelle London*

60 Get Ready for the Next Supply Disruption

Companies must build the capabilities to anticipate, detect, diagnose, activate resources for, protect against, and track known and unknown-but-knowable risks. *By M. Johnny Rungtusanatham and David A. Johnston*

66 When Algorithms Rule, Values Can Wither

Building responsible AI systems starts with recognizing that technology solutions implicitly prioritize efficiency. *By Dirk Lindebaum, Vern Glaser, Christine Moser, and Mehreen Ashraf*

70 Now You See Me, Now I'm Gone

As undervalued performers become more visible, they also gain more options to leave their employers. *By Boris Groysberg, Derek Haas, and Eric Lin*

76 A New Conflict-Resolution Model to Advance DEI

Organizations that manage tensions constructively can create and sustain change. *By Peter T. Coleman, Allegra Chen-Carrel, and Bodi M. Regan*

COLUMN

88 How Do I Escape the Specter of My Predecessor?

Coaching for the Future-Forward Leader. *By Sanyin Siang*

FRONTIERS

7 Every Company Needs a Political Strategy Today

Five principles will help business leaders take decisive action when fast-changing laws and regulations conflict with stakeholder values. *By Blair Levin and Larry Downes*

10 The Limits of Neuroscience in Business

Before investing in products or services that claim to provide business insights based on brain research, managers should understand several key issues with neuroscientific solutions. *By Jared Cooney Horvath*

13 Why Businesses Need to Embrace the Bioeconomy

Developing and using planet-friendly materials can yield new, more sustainable business models — and contribute to building a robust infrastructure for renewable biological resources. *By Donna Marshall, Aideen O'Dochartaigh, Andrea Prothero, Orlagh Reynolds, and Enrico Secchi*

16 Use Your Ambivalence to Make More Ethical Decisions

Being conscious of ambivalence helps decision makers suspend initial judgments, deflect biases, and integrate conflicting material. *By Morela Hernandez, Cristiano Guarana, and Catherine Owsik*

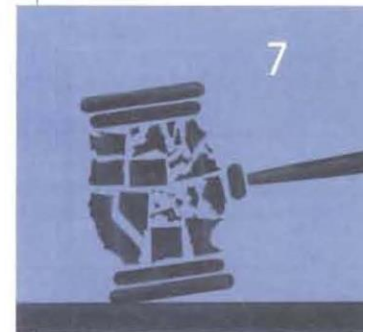

19 Rethinking How We Assess Companies on Social and Environmental Impact

A new framework offers a broader, more effective approach to assessing both the internal and external aspects of a company's social and sustainability performance. *By Nicholas Andreou and Marya Besharov*

ABOVE: Tsukimi Ayano, 72, crafts a new doll to commemorate the residents of her hometown of Nagoro, Japan. The shrinking hamlet has hundreds of dolls but just 25 inhabitants.

Pakistan's robust population growth and the accelerating buying behavior of the consumers, transformed Pakistan Super League in a short period of time. As a short-format high-value cricket league, it features participation of major international cricketers who not only visit Pakistan to join one of the franchised teams in the competitive tournament but act as an ambassador of their country. Infused with Pakistani money, motifs, and meanings, a new spectacle of consumption is on offer.

PHYSICS TODAY

January 2023 | volume 76 number 1

FEATURES

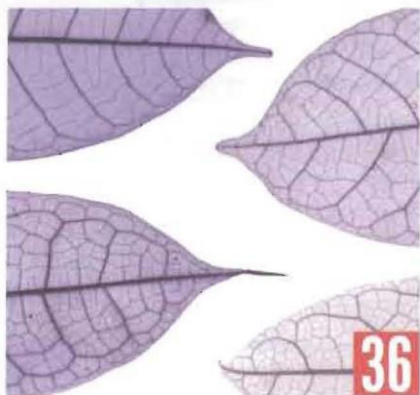

28

28 Ethics in physics: The need for culture change

Frances A. Houle, Kate P. Kirby, and Michael P. Marder

A new American Physical Society survey shows that although ethics education is more prevalent than it was nearly two decades ago, unethical research practices and harassment are still significant problems in the physics community.

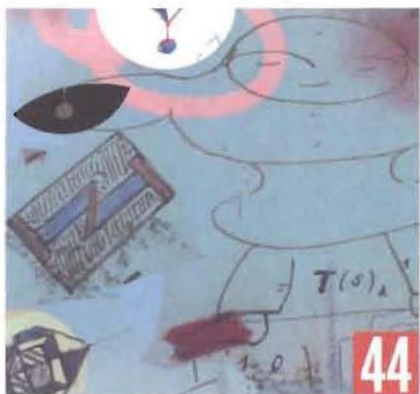

36

36 The topology of data

Mason A. Porter, Michelle Feng, and Eleni Katifori

Topological data analysis, which allows systematic investigations of the “shape” of data, has yielded fascinating insights into many physical systems.

44

44 Nazis, émigrés, and abstract mathematics

Ryan Dahn

Today, Jordan algebras are a sprawling mathematical subfield, but the strange story of their discovery amid Adolf Hitler’s seizure of power is not widely known.

ON THE COVER: Although usually permanently frozen, carbon-rich peatlands across this 3-km-wide stretch of Arctic tundra burned on 18 June 2020. The true-color image is overlaid by an IR filter that shows the fire hot spots. Arctic fires were exceptionally widespread during the 2019, 2020, and 2021 fire seasons compared with those of the past 20–40 years. See **page 17** to learn more about the complex set of interactions that affect high-latitude wildfires. (Satellite photo created by Adrià Descals; imagery acquired by the European Space Agency.)

The American Institute of Physics is a federation of scientific societies in the physical sciences, representing scientists, engineers, educators, and students. AIP offers authoritative information, services, and expertise in physics education and student programs, science communication, government relations, career services, statistical research in physics employment and education, industrial outreach, and history of the physical sciences. AIP publishes *PHYSICS TODAY* and is also home to the Society of Physics Students and to the Niels Bohr Library and Archives. AIP owns AIP Publishing, a scholarly publisher in the physical and related sciences.

Overview

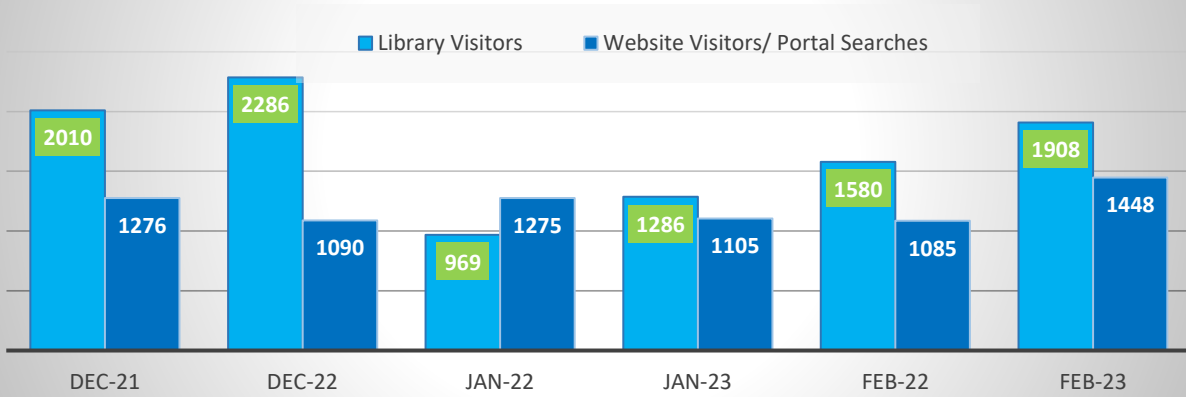

"Propelled by the belief that government has slipped out of the hands of ordinary citizens, a surging wave of populism is destabilizing democracies around the world. As John Matsusaka reveals in *Let the People Rule*, this belief is based in fact. Over the past century, while democratic governments have become more efficient, they have also become more disconnected from the people they purport to represent. The solution Matsusaka advances is familiar but surprisingly underused: direct democracy, in the form of referendums. While this might seem like a dangerous idea post-Brexit, there is a great deal of evidence that, with careful design and thoughtful implementation, referendums can help bridge the growing gulf between the government and the people. Drawing on examples from around the world, Matsusaka shows how direct democracy can bring policies back in line with the will of the people (and provide other benefits, like curbing corruption). Taking lessons from failed processes like Brexit, he also describes what issues are best suited to referendums and how they should be designed, and he tackles questions that have long vexed direct democracy: can voters be trusted to choose reasonable policies, and can minority rights survive majority decisions? The result is one of the most comprehensive examinations of direct democracy to date—coupled with concrete, nonpartisan proposals for how countries can make the most of the powerful tools that referendums offer. With a crisis of representation hobbling democracies across the globe, *Let the People Rule* offers important new ideas about the crucial role the referendum can play in the future of government"--
